

MPRO, MPRO-1, MPRO-2, MPRO-3

31 March 1959

MPRO-03

HARVEST Memory

The attached report and associated D/F is submitted for your review. After receipt of the engineering evaluation from ANEQ-1 a MPRO meeting will be held.

SAUL PINCUS
Chief, MPRO-03

Comments by Way

1. On the surface, it would appear that MPRO 3 would be ahead if the HS memory were dropped.
2. I am glad to see that MPRO 03 is taking a good look at the profitability of the H.S. Memory.
3. Bro Lehman or Mergemuth able to advise and/or help Aug in determining maintenance considerations (i.e. have that gotten that far in their Harvest Jug?)?

O'Hara/3267/bcp

1. MPRO-03 requests that ANEQ-1 perform an engineering evaluation of High Speed Memory. It is requested that information concerning the following items be furnished MPRO-03:

1. The ability of IBM to produce on schedule.
 2. Reliability of components to be used in construction.
 3. Maintenance considerations. (Please co-ordinate with MPRO-3.)
 4. Expected speed.
2. The attached report is forwarded for your information.

FOR CHIEF MPRO:

SAIL PINCUS
Chief, MPRO-03

cc: MPRO
MPRO-1
MPRO-2
MPRO-3
